About

As a generally creative person, who enjoys solving problems, I have been able to find my niche between design and development, as a front-end developer. I enjoy building interactive interfaces for users that look good and are delightful to use.

Experience

IKEA – Software Engineer   **11/2021 – Present**

As a Software Engineer at IKEA, I am responsible for implementing features, refactoring existing code, and remediating bugs, in their online store's checkout process. By collaborating with other engineers and product owners around the world, we are able to create a product that is used by all nations IKEA has a presence in. Utilizing front-end technologies, such as ReactJS, Typescript, Styled components, and design systems we are able to build out a reliable yet dynamic solution.

Softerware Inc. – Front End Developer   **12/2020 – 11/2021**

As a Front-End Developer at Softerware I was responsible for bringing our team's designs to life within our various products. I combine the creativity and empathy of a UX Designer with the skill set of a Front-End Developer. I served as a User Interface/Front-end Developer building our UX Chapter's designs and assisting in its integration within applications by our Product Development squads.

By utilizing front-end technologies, such as ReactJS, SCSS, Webpack, and Gulp, I was able to create reusable components, with a consistent look and feel for myself and other developers to use while building new features for our client retention service, DonorPerfect.

Softerware Inc. – Marketing Web & Design Team Lead   **01/2019 – 12/2020**

As a Web & Design Team Lead, at SofterWare, I was mainly responsible for leading large web development and design projects, for Softerware's Marketing Sites while mentoring other team members in design and code. Outside of design and web development I was responsible for managing a team of designers and developers. I also created and implemented project management processes for the entire marketing team.

Softerware Inc. – Senior Web & Graphic Designer   **01/2018 – 01/2019**
